

# 50% Cost-Share Funding is Available to Stabilize Eroding Streambanks on Your Property

The Chagrin River Watershed Partners, Inc. (CRWP), in partnership with Cuyahoga, Geauga, Portage and Lake County Soil and Water Conservation Districts, have received a Great Lakes Sediment and Nutrient Reduction Program grant to provide partial funding assistance to landowners to stabilize eroding streambanks using bio-engineering techniques.

## Streambank stabilization practices will use natural channel design and may include:

- Grading unstable stream slopes
- Planting woody vegetation to provide stability
- Installing in-stream structures to slow down water
- Installing tree revetments

## Project funding will target:

- Smaller streams in the following subwatersheds: Headwaters Aurora, Beaver Creek-Chagrin River, East Branch, Griswold Creek-Chagrin River
- Areas with sediment and nutrient impairments

## Funding available:

- A cost-share of 50% (up to \$100/linear foot)
- Project goal is to stabilize 2,000 linear feet of streambank
- Anticipate 5 to 9 cost-share contracts
