*Sponsored By the Soil and Water Conservation
Districts of Ashtabula, Geauga, Lake, Portage and
Trumbull Counties and Hiram College*

For more information
on Envirothon

What is Envirothon?

Envirothon is an academic team competition that allows students to demonstrate their knowledge of environmental topics and issues. Envirothon is an international organization where teams begin at the regional level and can compete all the way to an international stage!

Northeast Ohio's regional event is comprised of over 50 high schools from 17 Ohio counties and will take place in **April 2025**. Teams will be competing to qualify for the State Envirothon!

Envirothon Training

Join us at the James H. Barrow Biological Field Station for a comprehensive orientation of Envirothon competition and its five stations of competition. Station experts will present typical station props (including a soil pit), sample test questions, and more to help prepare you and your students for competition!

Already competing in Envirothon?

This event is a great orientation for new students interested in your program!

New to the Envirothon world?

Come out and learn about the competition and how to prepare your students!

HIRAM COLLEGE  **FIELD STATIONS**
Where education and nature **connect**.
